

Description of the German credit dataset.

1. Title: German Credit data

2. Source Information

Professor Dr. Hans Hofmann  
Institut f"ur Statistik und "Okonometrie  
Universit"at Hamburg  
FB Wirtschaftswissenschaften  
Von-Melle-Park 5  
2000 Hamburg 13

3. Number of Instances: 1000

Two datasets are provided. the original dataset, in the form provided by Prof. Hofmann, contains categorical/symbolic attributes and is in the file "german.data".

For algorithms that need numerical attributes, Strathclyde University produced the file "german.data-numeric". This file has been edited and several indicator variables added to make it suitable for algorithms which cannot cope with categorical variables. Several attributes that are ordered categorical (such as attribute 17) have been coded as integer. This was the form used by StatLog.

6. Number of Attributes german: 20 (7 numerical, 13 categorical)  
Number of Attributes german.number: 24 (24 numerical)

7. Attribute description for german

Attribute 1: (qualitative)  
Status of existing checking account  
A11 : ... < 0 DM  
A12 : 0 <= ... < 200 DM  
A13 : ... >= 200 DM /  
salary assignments for at least 1 year  
A14 : no checking account

Attribute 2: (numerical)  
Duration in month

Attribute 3: (qualitative)  
Credit history  
A30 : no credits taken/  
all credits paid back duly  
A31 : all credits at this bank paid back duly  
A32 : existing credits paid back duly till now  
A33 : delay in paying off in the past  
A34 : critical account/  
other credits existing (not at this bank)

Attribute 4: (qualitative)

Purpose

A40 : car (new)

A41 : car (used)

A42 : furniture/equipment

A43 : radio/television

A44 : domestic appliances

A45 : repairs

A46 : education

A47 : (vacation - does not exist?)

A48 : retraining

A49 : business

A410 : others

Attribute 5: (numerical)

Credit amount

Attribute 6: (qualitative)

Savings account/bonds

A61 : ... < 100 DM

A62 : 100 <= ... < 500 DM

A63 : 500 <= ... < 1000 DM

A64 : .. >= 1000 DM

A65 : unknown/ no savings account

Attribute 7: (qualitative)

Present employment since

A71 : unemployed

A72 : ... < 1 year

A73 : 1 <= ... < 4 years

A74 : 4 <= ... < 7 years

A75 : .. >= 7 years

Attribute 8: (numerical)

Installment rate in percentage of disposable income

Attribute 9: (qualitative)

Personal status and sex

A91 : male : divorced/separated

A92 : female : divorced/separated/married

A93 : male : single

A94 : male : married/widowed

A95 : female : single

Attribute 10: (qualitative)

Other debtors / guarantors

A101 : none

A102 : co-applicant

A103 : guarantor

Attribute 11: (numerical)

Present residence since

Attribute 12: (qualitative)

Property  
 A121 : real estate  
 A122 : if not A121 : building society savings agreement/  
           life insurance  
       A123 : if not A121/A122 : car or other, not in attribute 6  
 A124 : unknown / no property

Attribute 13: (numerical)  
       Age in years

Attribute 14: (qualitative)  
       Other installment plans  
       A141 : bank  
       A142 : stores  
       A143 : none

Attribute 15: (qualitative)  
       Housing  
       A151 : rent  
       A152 : own  
       A153 : for free

Attribute 16: (numerical)  
       Number of existing credits at this bank

Attribute 17: (qualitative)  
       Job  
       A171 : unemployed/ unskilled - non-resident  
       A172 : unskilled - resident  
       A173 : skilled employee / official  
       A174 : management/ self-employed/  
             highly qualified employee/ officer

Attribute 18: (numerical)  
       Number of people being liable to provide maintenance for

Attribute 19: (qualitative)  
       Telephone  
       A191 : none  
       A192 : yes, registered under the customers name

Attribute 20: (qualitative)  
       foreign worker  
       A201 : yes  
       A202 : no

## 8. Cost Matrix

This dataset requires use of a cost matrix (see below)

1	0	1
2	5	0

(1 = Good, 2 = Bad)

the rows represent the actual classification and the columns  
the predicted classification.

It is worse to class a customer as good when they are bad (5),  
than it is to class a customer as bad when they are good (1).
